

PV-WAVE 12.0 Supported Platforms

June 2016

		PV-WAVE Extreme Advantage 12.0			PV-WAVE Advantage 12.0			PV-WAVE Foundation 12.0			PV-WAVE Database Connection (Oracle) 5.15		PV-WAVE Database Connection (Sybase) 5.15		PV-WAVE ODBC Connection 2.05				
Operating System / Platform		PV-WAVE 32- / 64-bit																	
Windows / x86, AMD64, x86-64		32 and 64		7	8.1	10	7	8.1	10	7	8.1	10					7	8.1	10
Red Hat Enterprise Linux / x86, AMD64, x86-64 ¹⁾		32 and 64		7.1			7.1			7.1			7.1		7.1				
SUSE Linux Enterprise Server / AMD64, x86-64 ¹⁾		64		12.0			12.0			12.0			12.0		12.0				
CentOS Linux 7 / AMD64, x86-64 ¹⁾		64		7.0			7.0			7.0			7.0		7.0				
Solaris / SPARC		32 and 64		10			10			10			10		10				

¹⁾ PV-WAVE 12.0 is built and certified on Red Hat Enterprise Linux 7.1, based on the Linux 3.10 kernel. SUSE Linux 12.0, based on the Linux 3.12 kernel, has been certified. CentOS 7, also based on the Linux 3.10 kernel, has been certified. It has been our experience that PV-WAVE 12.0 runs correctly on other Linux distributions that are based on the 3.10 kernel and 3.12 kernel.

For more detailed platform information, see the PV-WAVE 12.0 Release Notes.
